Java Full Stack Developer | Java | Spring Boot | Angular | React.js | Next.js | Artificial intelligence | AI Tools | MySQL | System Design

PROFESSIONAL SUMMARY

Full Stack Java Developer with 2+ years of experience in designing, developing, enhancing, and maintaining enterprise web applications using Java, Spring Boot, Angular, React.js, Next.js, TypeScript, and MySQL. Experienced in developing and integrating REST APIs, implementing business logic, resolving complex application issues, and building responsive user interfaces. Hands-on experience working on HRMS and ATS platforms, including employee management, payroll, attendance, timesheets, leave management, probation management, and goal management. Contributed to migrating Angular applications to Next.js while maintaining existing business logic and API integrations. Experienced in implementing third-party integrations, including Google Calendar, Gmail, Outlook meeting scheduling, and AI-powered features for goal management. Strong focus on application performance, code quality, functional testing, troubleshooting, and delivering reliable, scalable solutions in collaborative development environments.

SKILLS

Programming Languages: Java, JavaScript, PHP, SQL, HTML, CSS

Backend Technologies: Spring Boot, REST APIs, Microservices

Frontend Technologies: Angular, React.js, Next.js, Bootstrap

Databases: MySQL, Oracle, Solr DB

Development Tools & Platforms: Git, Google Cloud Platform (GCP)**,** Microsoft Office, WordPress, Postman, Docker, Data Structures & Algorithms

AI & Productivity: AI-assisted Development, Prompt Engineering, Microsoft BI & AI Tools, Claude code

PROFESSIONAL EXPERIENCE

SwarmHR – Java Developer Nov 2024 – present

Hyderabad, Telangana · Full-time, On-site

Project 1 — SwarmHR (Software for Workforce Automation and Resource Management)

- Developed and maintained features across employee management, attendance, timesheets, leave management, payroll, onboarding, probation, performance evaluation, exit management, and goal management.
- Integrated Spring Boot REST APIs with frontend components to support HR workflows and data exchange between application modules.
- Contributed to migrating Angular modules to Next.js while preserving existing API integrations and business logic.
- Implemented responsive UI enhancements and resolved functional issues to improve usability across desktop and mobile screens.
- Worked on form validation, pagination, sorting, data display, and UI alignment issues across relevant modules.
- Integrated Google Calendar, Gmail, and Outlook functionality into meeting scheduling and related workflows.
- Implemented and tested AI-assisted goal-plan drafting functionality, including validation and UI improvements.
- Tech stack: Java, Spring Boot, Angular, Next.js, Bootstrap, MySQL, REST APIs, Microservices and Solr DB.

Project 2 — ATS (Applicant Tracking System) & SwarmHR Core Modules Nov 2024 – Jun 2025

- Developed and maintained application features supporting recruitment and HR-related workflows.
- Built and integrated REST API functionality between Spring Boot services and Angular components.
- Used SQL queries and database operations to support application data handling.
- Implemented and maintained UI functionality, including filtering, pagination, sorting, and form validation where required.
- Tested API responses, investigated defects, and fixed functional issues during development.
- Collaborated with team members during sprint delivery, code reviews, and regression testing.

Thoughtwave Software Solutions – Java Developer Intern Jul 2024 – Oct 2024

Hyderabad, Telangana · Internship · 4 Months

- Contributed to HR application features using Java, Angular, and web technologies.
- Assisted with developing and testing REST APIs and UI components under senior developer guidance.
- Gained experience with Git-based workflows, Agile methodology, and enterprise development practices.

Project 3 — Ritu Broadband – Full-Stack Developer

Independent Client Project · Live at: ritubroadband.in · Delivered in under one week

- Independently designed, developed, and deployed a business website for a broadband service provider as a paid client project.
- Handled requirements gathering, development, and live deployment using React.js, Bootstrap, and PHP.
- Integrated Razorpay payment gateway into the React.js frontend, enabling secure, reliable, and smooth online payments for clients and customers.
- Used AI-assisted development tools to support coding and debugging while validating the generated output. Delivered the live website in time.

PROJECTS

College Website Development – Govt. Degree College, Avanigadda

- Designed and developed a responsive college website using PHP, HTML, CSS, JavaScript, and SQL.
- Delivered the college website as an independent project.

AI & PRODUCTIVITY EDGE

AI-assisted development:

- Use prompt engineering to explore solutions and review generated code against project requirements.
- Use AI tools to assist with coding and debugging while checking outputs against project requirements.
- Applied AI-assisted development while building the React.js and PHP client website.

EDUCATION

B.Sc Computer Science – Govt. Degree College, Krishna University 2021 – 2024 | 80%

Intermediate (M.P.C) – VDA Junior College, Gajuwaka 2019 – 2021 | 96.3%

SSC (10th Grade) – Gandhi Vidhyalaya, Machilipatnam 2018 – 2019 | 97%

ACHIEVEMENTS & INTERESTS

- Independently delivered a full-stack commercial website for a client, from requirements gathering through development and deployment.
- Contributed to HRMS modules and sprint deliverables at Thoughtwave Software Solutions.
- Languages: English, Telugu
